Pay-As-You-Go Integration!

WOPR CONNECT API

Seamless Integration with 1000+ Payroll
Software Systems to 160+ Insurance Carrier Platforms via API

Flexible Integration, Scalable Service, Broker-Focused

The PayComp Story

2011
LAYING THE FOUNDATION

We started as an Independent Commercial **Insurance Agency.**

2016
OPERATIONAL EVOLUTION

We launched our Regional **Payroll Bureau**, providing payroll services for small to mid-sized businesses and integrating Pay-As-You-Go Workers' Compensation policies.

2025
FROM CAPABILITY TO SOLUTION

We launched **PayComp**, a seamless *Pay-As-You-Go Integration Solution* for Workers Compensation offered to ALL Insurance Brokers.

Why Was PayComp Created?

Pay As You Go programs have too many Roadblocks & Obstacles for Agents.

Some Insurance **Carriers don't offer** an integrated **Pay-As-You-Go** program.

Insurance Clients often have the **wrong payroll provider** that will not integrate with the insurance carrier.

Why PayComp?

Improved Value Proposition to your policy holders:
Clients want more payment options, automation, & hassle-free reporting.

PayComp takes on the challenges of workers' comp reporting by engaging all payroll providers directly:
Avoid inaccurate and late payroll reporting that cause NOCs and payment collection hassles.

Improve Broker/Agent Partnership:
Offer competitive down payment policies with hassle free payroll integration.

The PayComp Advantage

Clean & On-time Data:
Automated reporting via integration.

Compatible with All Payroll Providers:
ADP, Paychex, QuickBooks, Sage, UKG, Gusto, Rippling, etc.

5 Levels of Carriers Service: Manual, 3rd-Party, Carrier Direct, Exclusive Pay-as-you-go Integrator, Full Development Engagement.

The PayComp Process

Needs Analysis (Identify API Integration Options)

Build Carrier Connections & Integration

Add Carrier to PayComp Agency Platform / Portal Access

Go Live! Turn On Access for ALL Broker / Agents

Flexible Integration, Scalable Service, Broker-Focused

- ✓ Integrate with All Payroll Providers
- ✓ Offer Pay-As-You-Go Reporting to All Policyholders
- ✓ The PayComp Advantage

Modernize Your Workers' Comp Offering

5 Levels of Carrier Service

Flexible Integration, Scalable Service, Broker-Focused

Level 1
Manual Reporting Services

FTP or Direct Carrier Log-In

Hands-on reporting via secure FTP or direct portal access

Ideal for carriers without technical integrations

Full-service: PayComp handles submission on your behalf

Level 2
Third-Party Tool Integration

Payroll Platform Integrations

Automated payroll data sync to platforms like **SmartPay** or **InsurePay**

Ideal for clients or carriers already using third-party platforms

Full-service: PayComp manages policy data and submissions across carriers

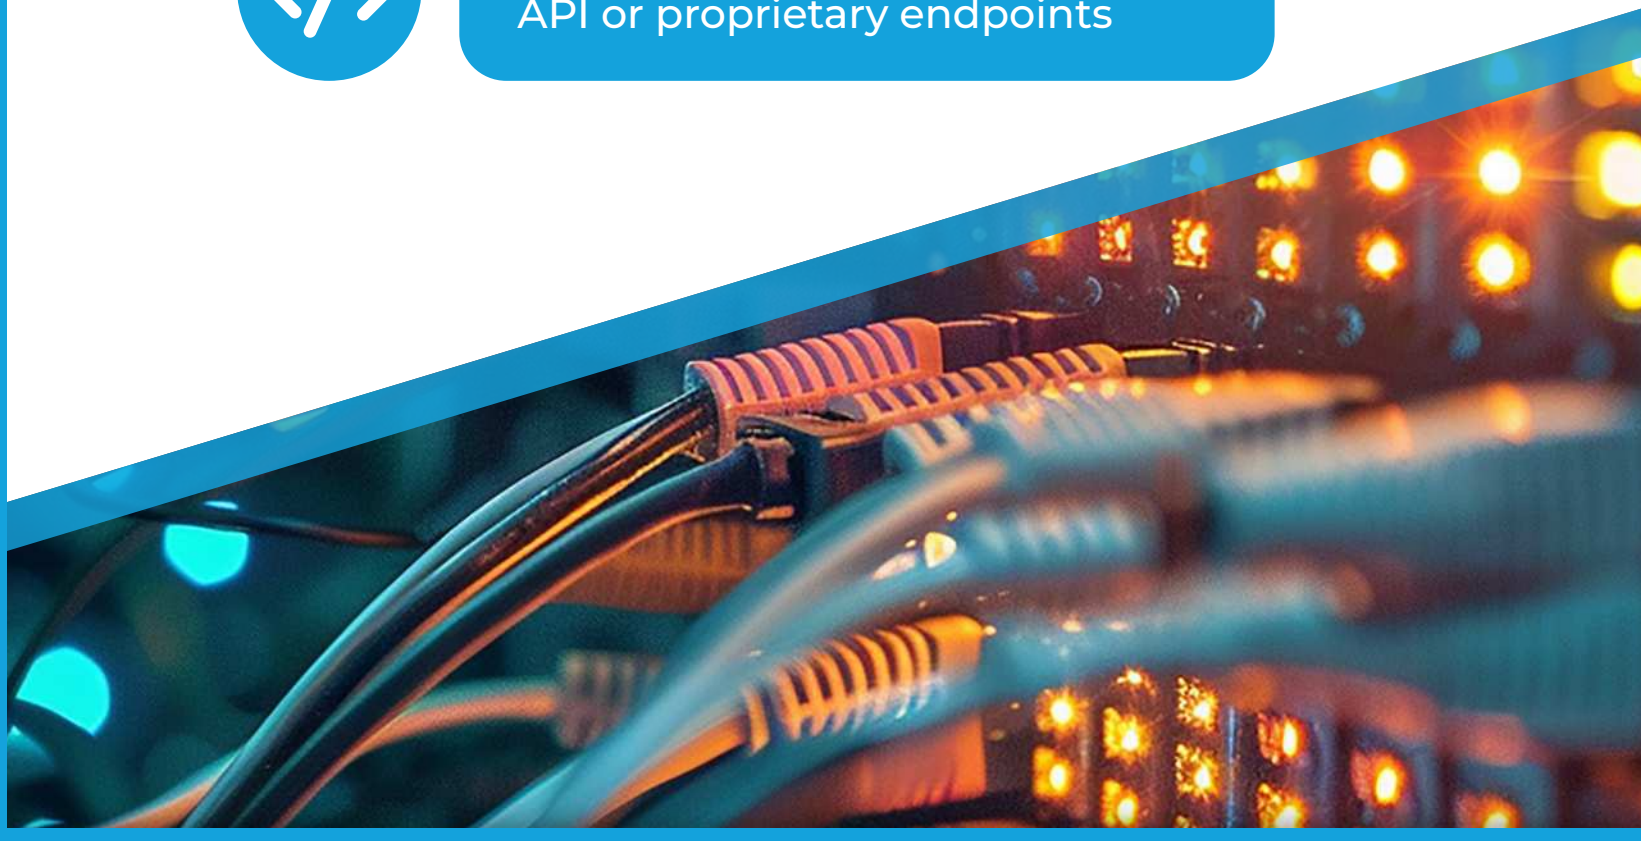

Level 3
Carrier-Direct API Integration

180° Integration with Carrier Systems

Automated wage reporting directly to carrier APIs

No need for manual uploads or portal logins

Ideal for carriers offering open API or proprietary endpoints

Level 4

Dedicated 3rd Party Integration Reporting Tool

White-labeled portal or API endpoint branded to the carrier

Direct integration with all payroll providers

Customized report structures aligned with carrier preferences

Full-service: Dedicated implementation, support, and customized workflows managed by PayComp

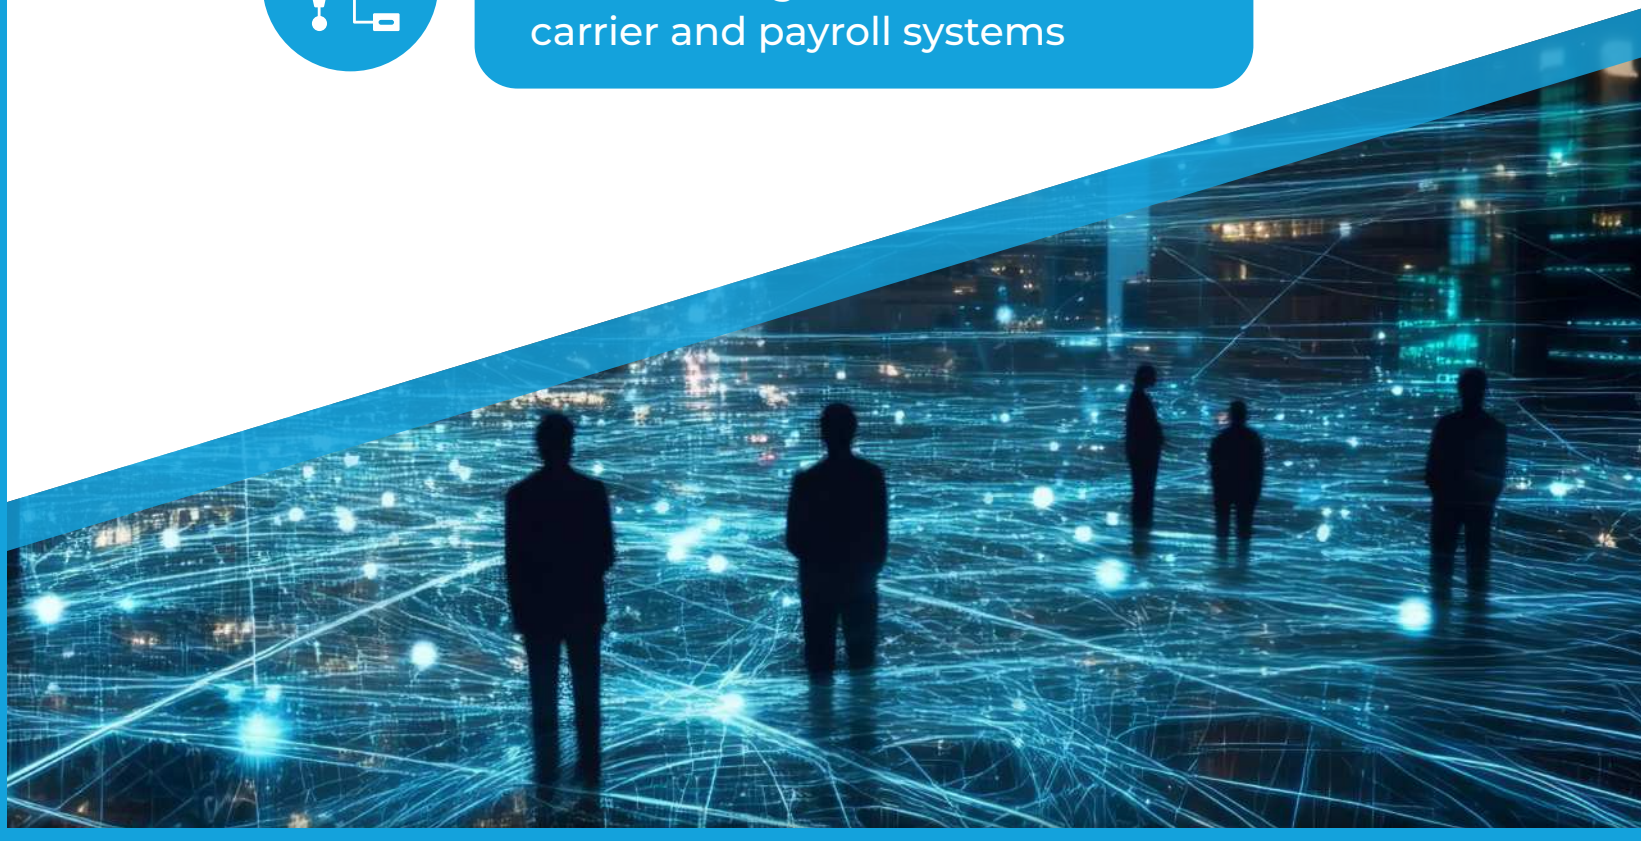

Level 5
Carrier-Direct API Integration

Dual-Side Custom Integration

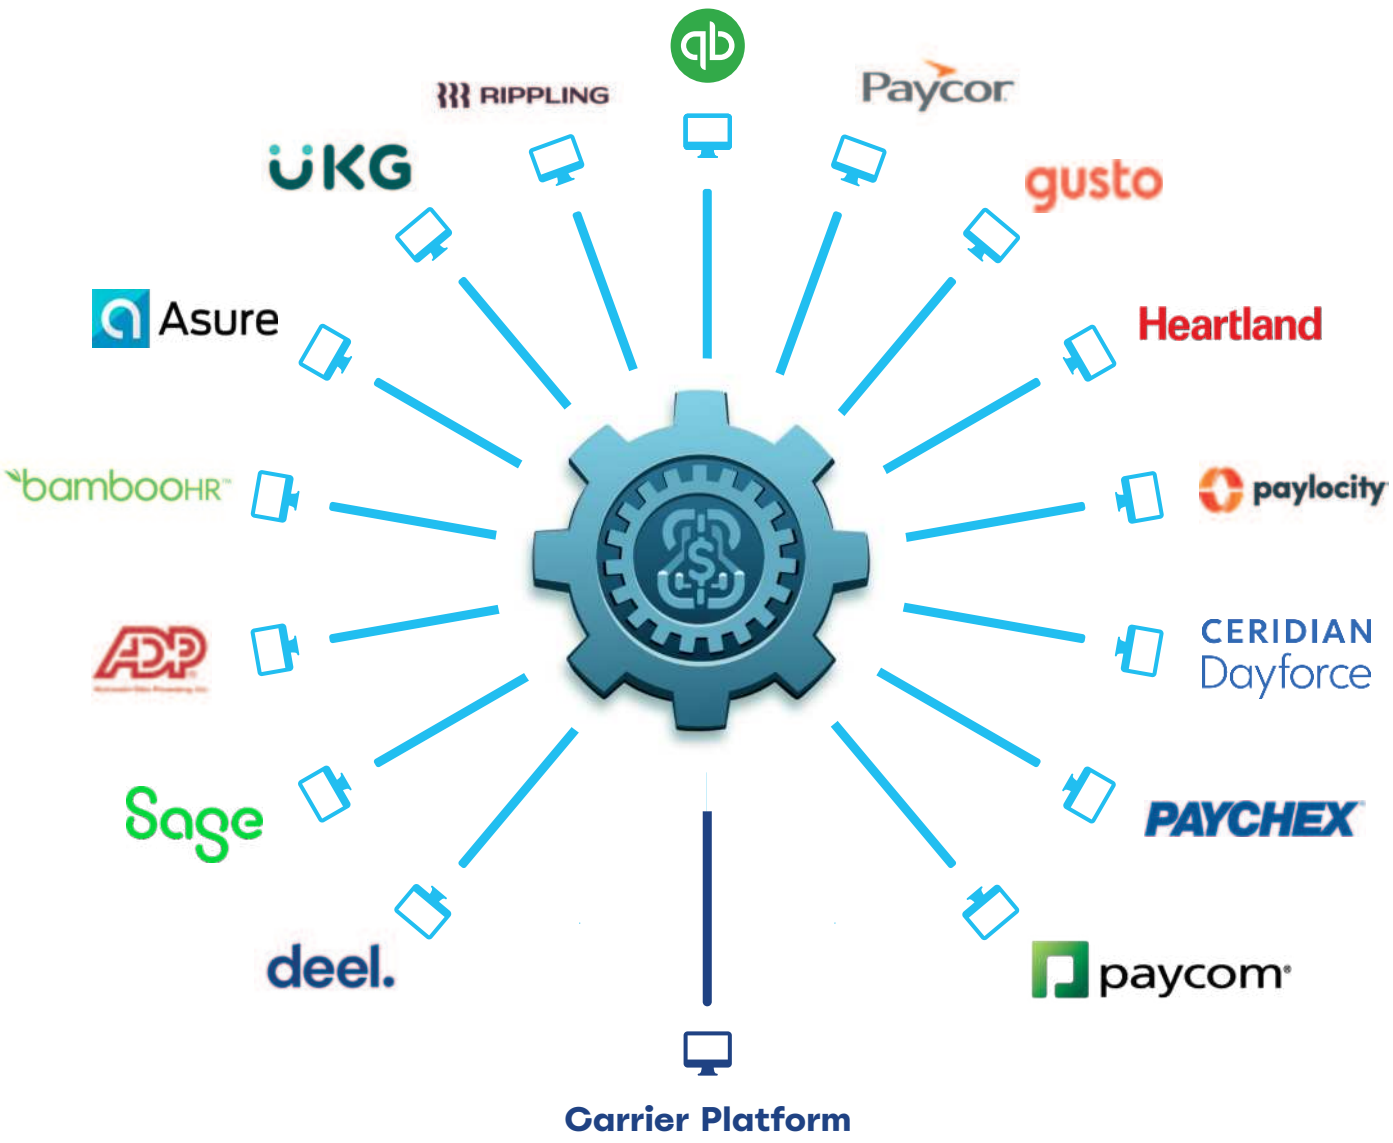

PayComp builds **custom APIs/connectors** for both sides

Designed for enterprise carriers and payroll systems without pre-built integrations

Full-service: PayComp engineers custom integrations between carrier and payroll systems

Platform Tech Stack:
What PayComp Does

PayComp provides a middleware API that standardizes and transmits payroll data directly to insurance carriers in real time. Our integration layer bridges the gap between payroll systems and carrier underwriting requirements **securely, automatically, and at scale.**

Core Capabilities:

Universal API Layer

Integrate any payroll provider or internal system using a single RESTful interface. Supports JSON, XML, CSV, or flat-file inputs.

Automated Data Mapping
AI-assisted normalization converts raw payroll data into each carrier's specific schema, including class codes, policy identifiers, and audit fields.

Hybrid Integration Options
Use API, SFTP, or a combined pipeline to meet any carrier's technical readiness level.

Platform Tech Stack:
Security & Developer Features

- **End-to-end AES-256 encryption,** token-based authentication, and complete audit logs. **HIPAA and SOC-aligned practices.**
- **Pre-submission validation catches data mismatches** before they reach underwriting, reducing policy delays and re-quotes.
- **Easily onboard new carriers or payroll partners.** Each configuration runs independently, ensuring stability and speed as your network grows.
- **Real-time JSON payload exchange** for policy, payroll, and premium data.
- **Push notifications** for billing, audit, and status updates.
- **Built-in CSV/XML → JSON converter.**
- **Safe testing** with mock carrier responses.

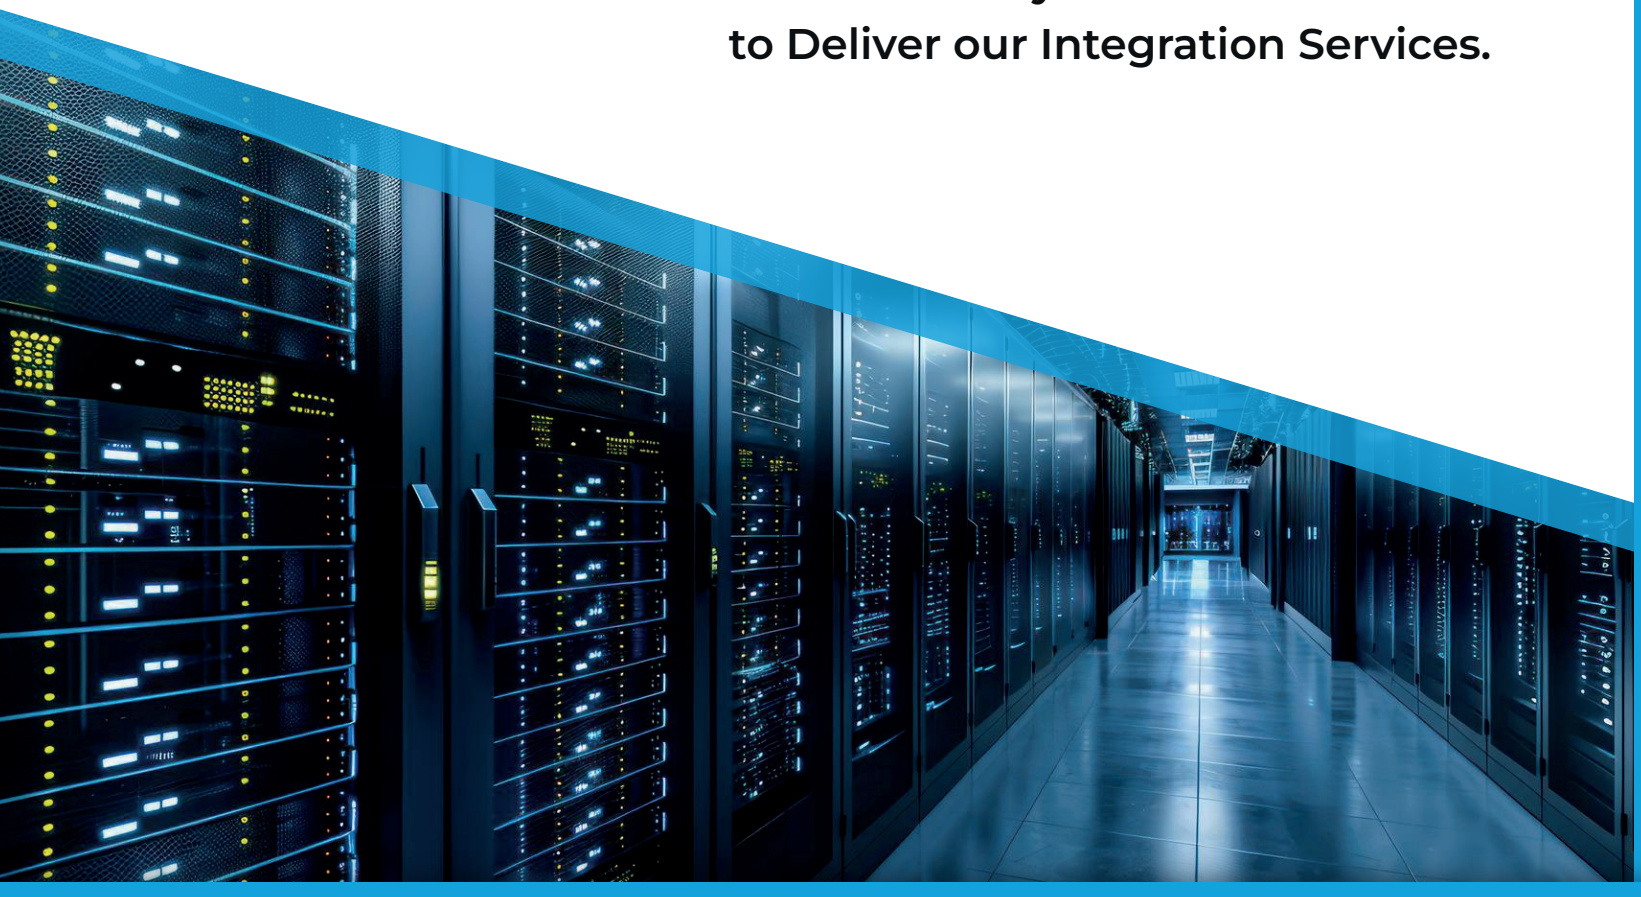

Terms of Use
And Data Privacy

Your Data Stays Your Data

- We never sell, sublicense, or monetize your data.
- Your data is used strictly for platform operations.
- No unauthorized data use or access.
- No sharing of data to third parties.

We Only Use Partners' Data to Deliver our Integration Services.

Data Security & Compliance

Certified and compliant with globally recognized security, audit, and privacy standards.
